VersionStringTable Class

# VersionStringTable Class

Represents a string table of a file version resource.

## Methods

Method	Description
<code>Clear()</code>	Removes all strings from the string table.
<code>GetEnumerator()</code>	Gets an enumeration over all strings in the table.

## Properties

Property	Description
<code>Count</code>	Gets the number of strings in the table.
<code>Item</code>	Gets or sets a string value.

Property	Description
<b>Keys</b>	Gets a collection of all the names of the strings in the table.
<b>Locale</b>	Gets the locale (LCID) of the string table.
<b>Values</b>	Gets a collection of all the values in the table.

`WixToolset.Dtf.Resources.dll` version `4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9`

## Clear() Method

Removes all strings from the string table.

### Declaration

```
public void Clear()
```

## GetEnumerator() Method

Gets an enumeration over all strings in the table.

### Declaration

```
public IEnumerable<System.Collections.Generic.KeyValuePair`2<System.String, System.String>> GetEnumerator()
```

`IEnumerable<System.Collections.Generic.KeyValuePair`2<System.String, System.String>>` Enumeration of string name and value pairs

## Count Property

Gets the number of strings in the table.

### Declaration

```
public int Count { get; set; }
```

## Item Property

Gets or sets a string value.

### Declaration

```
public string Item[  
    string key  
] { get; set; }
```

## Parameters

Parameter	Type	Description
key	string	Name of the string.

## Keys Property

Gets a collection of all the names of the strings in the table.

### Declaration

```
public System.Collections.Generic.ICollection<System.String> Keys { get; set; }
```

## Locale Property

Gets the locale (LCID) of the string table.

### Declaration

```
public int Locale { get; set; }
```

# Values Property

Gets a collection of all the values in the table.

## Declaration

```
public System.Collections.Generic.ICollection<System.String> Values { get; set; }
```
