# WixToolset.Dtf.Compression.Zip namespace

## Classes

Class	Description
<a href="#">CrcStream</a>	Wraps a source stream and calculates a CRC over all bytes that are read or written.
<a href="#">ZipEngine</a>	Engine capable of packing and unpacking archives in the zip format.
<a href="#">ZipException</a>	Exception class for zip operations.
<a href="#">ZipFileInfo</a>	Object representing a compressed file within a zip package; provides operations for getting the file properties and extracting the file.
<a href="#">ZipInfo</a>	Object representing a zip file on disk; provides access to file-based operations on the zip file.

## Enumerations

Enumeration	Description
<code>ZipCompressionMethod</code>	Identifies the compression method or "algorithm" used for a single file within a zip archive.
