

DatabaseColumnAttribute Class

Apply to a property on a subclass of QRecord to indicate the name of the column the property is to be associated with.

Properties

Property	Description
Column	Gets or sets the column associated with the record property.

Remarks

If this attribute is not used on a property, the default column name will be the same as the property name.

WixToolset.Dtf.WindowsInstaller.Linq.dll version 4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9

Column Property

Gets or sets the column associated with the record property.

Declaration

```
public string Column { get; set; }
```
