

[WiX managed SDK](#)[WixToolset.Data.WindowsInstaller namespace](#)[Table Class](#)

Table Class

Object that represents a table in a database.

Methods

Method	Description
<code>CreateRow(sourceLineNumbers)</code>	Creates a new row and adds it to the table.
<code>ValidateRows()</code>	Validates the rows of this OutputTable and throws if it collides on primary keys.

Properties

Property	Description
<code>Definition</code>	Gets the table definition.
<code>Name</code>	Gets the name of the table.

Property	Description
Operation	Gets or sets the table transform operation.
Rows	Gets the rows contained in the table.

WixToolset.Data.dll version 4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9

CreateRow(sourceLineNumbers) Method

Creates a new row and adds it to the table.

Declaration

```
public Row CreateRow(  
    WixToolset.Data.SourceLineNumber sourceLineNumbers  
)
```

Parameters

Parameter	Type	Description
sourceLineNumbers	WixToolset.Data.SourceLineNumber	Original source lines for this row.

Return value

`Row` Row created in table.

ValidateRows() Method

Validates the rows of this OutputTable and throws if it collides on primary keys.

Declaration

```
public void ValidateRows()
```

Definition Property

Gets the table definition.

Declaration

```
public TableDefinition Definition { get; set; }
```

Name Property

Gets the name of the table.

Declaration

```
public string Name { get; set; }
```

Operation Property

Gets or sets the table transform operation.

Declaration

```
public TableOperation Operation { get; set; }
```

Rows Property

Gets the rows contained in the table.

Declaration

```
public IList<WixToolset.Data.WindowsInstaller.Row> Rows { get; set; }
```
