

WiX managed SDK

WixToolset.Dtf.WindowsInstaller.Package namespace

TransformInfo Class

TransformInfo Class

Contains properties of a transform package (.MST).

Methods

Method	Description
<code>ToString()</code>	Returns the name of the transform.

Properties

Property	Description
<code>Name</code>	Gets the filename of the transform.
<code>TargetLanguage</code>	Gets the target language of the transform, or 0 if the transform is language-neutral.
<code>TargetPlatform</code>	Gets the target platform of the transform.

Property	Description
TargetProductCode	Gets the target product code of the transform.
TargetProductVersion	Gets the target product version of the transform.
UpgradeCode	Gets the upgrade code of the transform.
UpgradeProductCode	Gets the upgrade product code of the transform.
UpgradeProductVersion	Gets the upgrade product version of the transform.
Validations	Gets the validation flags specified when the transform was generated.

WixToolset.Dtf.WindowsInstaller.Package.dll version 4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9

ToString() Method

Returns the name of the transform.

Declaration

```
public string ToString()
```

Name Property

Gets the filename of the transform.

Declaration

```
public string Name { get; set; }
```

TargetLanguage Property

Gets the target language of the transform, or 0 if the transform is language-neutral.

Declaration

```
public int TargetLanguage { get; set; }
```

TargetPlatform Property

Gets the target platform of the transform.

Declaration

```
public string TargetPlatform { get; set; }
```

Gets the target product code of the transform.

Declaration

```
public string TargetProductCode { get; set; }
```

TargetProductVersion Property

Gets the target product version of the transform.

Declaration

```
public string TargetProductVersion { get; set; }
```

UpgradeCode Property

Gets the upgrade code of the transform.

Declaration

```
public string UpgradeCode { get; set; }
```

Gets the upgrade product code of the transform.

Declaration

```
public string UpgradeProductCode { get; set; }
```

UpgradeProductVersion Property

Gets the upgrade product version of the transform.

Declaration

```
public string UpgradeProductVersion { get; set; }
```

Validations Property

Gets the validation flags specified when the transform was generated.

Declaration

```
public WixToolset.Dtf.WindowsInstaller.TransformValidations Validations { get; set; }
```
