

[WiX managed SDK](#)[WixToolset.Dtf.Compression.Zip namespace](#)[ZipFileInfo Class](#)

ZipFileInfo Class

Object representing a compressed file within a zip package; provides operations for getting the file properties and extracting the file.

Methods

Method	Description
GetObjectData(info, context)	Sets the SerializationInfo with information about the archive.

Properties

Property	Description
CompressedLength	Gets the compressed size of the file in bytes.
CompressionMethod	Gets the method used to compress this file.

WixToolset.Dtf.Compression.Zip.dll version 4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9

GetObjectData(info, context) Method

Sets the SerializationInfo with information about the archive.

Declaration

```
public void GetObjectData(  
    System.Runtime.Serialization.SerializationInfo info,  
    System.Runtime.Serialization.StreamingContext context  
)
```

Parameters

Parameter	Type	Description
info	System.Runtime.Serialization.SerializationInfo	The SerializationInfo that holds the serialized object data.
context	System.Runtime.Serialization.StreamingContext	The StreamingContext that contains contextual information about the source or destination.

CompressedLength Property

Gets the compressed size of the file in bytes.

Declaration

```
public System.Int64 CompressedLength { get; set; }
```

CompressionMethod Property

Gets the method used to compress this file.

Declaration

```
public ZipCompressionMethod CompressionMethod { get; set; }
```
