🏠   WiX managed SDK   WixToolset.Dtf.Compression.Cab namespace   CabException Class

CabException Class

Exception class for cabinet operations.

Methods

Method	Description
GetObjectData(info, context)	Sets the SerializationInfo with information about the exception.

Properties

Property	Description
Error	Gets the FCI or FDI cabinet engine error number.
ErrorCode	Gets the Win32 error code.

`WixToolset.Dtf.Compression.Cab.dll` version `4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9`

GetObjectData(info, context) Method

Sets the SerializationInfo with information about the exception.

Declaration

```
public void GetObjectData(
    System.Runtime.Serialization.SerializationInfo info,
    System.Runtime.Serialization.StreamingContext context
)
```

Parameters

Parameter	Type	Description
info	System.Runtime.Serialization.SerializationInfo	The SerializationInfo that holds the serialized object data about the exception being thrown.
context	System.Runtime.Serialization.StreamingContext	The StreamingContext that contains contextual information about the source or destination.

Error Property

Gets the FCI or FDI cabinet engine error number.

Declaration

```
public int Error { get; set; }
```

ErrorCode Property

Gets the Win32 error code.

Declaration

```
public int ErrorCode { get; set; }
```
