🏠   WiX managed SDK   WixToolset.Dtf.WindowsInstaller.Linq namespace   DatabaseTableAttribute Class

DatabaseTableAttribute Class

Apply to a subclass of QRecord to indicate the name of the table the record type is to be used with.

Properties

Property	Description
Table	Gets or sets the table associated with the record type.

Remarks

If this attribute is not used on a record type, the default table name will be derived from the record type name. (An optional underscore suffix is stripped.) `WixToolset.Dtf.WindowsInstaller.Linq.dll` version `4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9`

Table Property

Gets or sets the table associated with the record type.

Declaration

```
public string Table { get; set; }
```
