🏠   WiX managed SDK   WixToolset.Dtf.WindowsInstaller namespace   InstallCost Struct

InstallCost Struct

Represents a per-drive disk space cost for an installation.

Properties

Property	Description
Cost	The installation cost on this drive, as a number of bytes.
DriveName	The name of the drive this cost data applies to.
TempCost	The temporary disk space required on this drive, as a number of bytes.

`WixToolset.Dtf.WindowsInstaller.dll` version `4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9`

Cost Property

The installation cost on this drive, as a number of bytes.

Declaration

```
public System.Int64 Cost { get; set; }
```

DriveName Property

The name of the drive this cost data applies to.

Declaration

```
public string DriveName { get; set; }
```

TempCost Property

The temporary disk space required on this drive, as a number of bytes.

Declaration

```
public System.Int64 TempCost { get; set; }
```

Remarks

This temporary space requirement is space needed only for the duration of the installation, over the final footprint on disk.
