🏠   WiX managed SDK   WixToolset.Dtf.Resources namespace   ResourceType Class

ResourceType Class

Represents either a standard integer resource type or a custom resource type name.

Methods

Method	Description
Equals(obj)	Tests whether one resource type equals another object.
Equals(otherType)	Tests whether one resource type equals another.
GetHashCode()	Gets a hash code suitable for using the resource type as a dictionary key.
ToString()	Gets a string representation of the resource type.

Properties

Property	Description

Property	Description
IntegerValue	Gets the integer value of the resource type, or -1 if the resource type is not an integer.
IsInteger	Gets a flag indicating whether the resource type is an integer type.

`WixToolset.Dtf.Resources.dll` version `4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9`

Equals(obj) Method

Tests whether one resource type equals another object.

Declaration

```
public bool Equals(
    System.Object obj
)
```

Parameters

Parameter	Type	Description
obj	System.Object	Other object.

Return value

`bool` True if equal, else false.

Equals(otherType) Method

Tests whether one resource type equals another.

Declaration

```
public bool Equals(
    ResourceType otherType
)
```

Parameters

Parameter	Type	Description
otherType	ResourceType	Other resource type.

Return value

`bool` True if equal, else false.

GetHashCode() Method

Gets a hash code suitable for using the resource type as a dictionary key.

Declaration

```
public int GetHashCode()
```

Return value

`int` Hash code based on the resource type string.

ToString() Method

Gets a string representation of the resource type.

Declaration

```
public string ToString()
```

Return value

`string` The custom resource name, or the name of a well-known resource type.

IntegerValue Property

Gets the integer value of the resource type, or -1 if the resource type is not an integer.

Declaration

```
public int IntegerValue { get; set; }
```

IsInteger Property

Gets a flag indicating whether the resource type is an integer type.

Declaration

```
public bool IsInteger { get; set; }
```
