🏠   WiX managed SDK   WixToolset.Dtf.WindowsInstaller.Package namespace   InstallPackageProperties Class

InstallPackageProperties Class

Accessor for getting and setting properties of the «see T:WixToolset.Dtf.WindowsInstaller.Package.InstallPackage» database.

Properties

Property	Description
Item	Gets or sets a property in the database. When getting a property that does not exist in the database, an empty string is returned. To remove a property from the database, set it to an empty string.

`WixToolset.Dtf.WindowsInstaller.Package.dll` version `4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9`

Item Property

Gets or sets a property in the database. When getting a property that does not exist in the database, an empty string is returned. To remove a property from the database, set it to an empty string.

Declaration

```
public string Item { get; set; }
```

This has the same results as direct SQL queries on the Property table; it's only meant to be a more convenient way of access.
