🏠   WiX managed SDK   WixToolset.Dtf.WindowsInstaller namespace   **ShortcutTarget Struct**

ShortcutTarget Struct

Holds information about the target of a shortcut file.

Methods

Method	Description
Equals(obj)	Tests whether two shortcut targets have the same product code, feature, and/or component code.
GetHashCode()	Generates a hash code using all parts of the shortcut target.

Properties

Property	Description
ComponentCode	Gets the target component code of the shortcut, or null if not available.
Feature	Gets the name of the target feature of the shortcut, or null if not available.

Property	Description
ProductCode	Gets the target product code of the shortcut, or null if not available.

`WixToolset.Dtf.WindowsInstaller.dll` version `4.0.2+644ed0118bae1aa885bb6cc906dc6c0b904de4d9`

Equals(obj) Method

Tests whether two shortcut targets have the same product code, feature, and/or component code.

Declaration

```
public bool Equals(
    System.Object obj
)
```

Parameters

Parameter	Type	Description
obj	System.Object	The shortcut target to compare to the current object.

Return value

`bool` True if *obj* is a shortcut target and all parts of the targets are the same, else false.

GetHashCode() Method

Generates a hash code using all parts of the shortcut target.

Declaration

```
public int GetHashCode()
```

Return value

`int` An integer suitable for hashing the shortcut target.

ComponentCode Property

Gets the target component code of the shortcut, or null if not available.

Declaration

```
public string ComponentCode { get; set; }
```

Feature Property

Gets the name of the target feature of the shortcut, or null if not available.

Declaration

```
public string Feature { get; set; }
```

ProductCode Property

Gets the target product code of the shortcut, or null if not available.

Declaration

```
public string ProductCode { get; set; }
```
